Changing the Default Web Browser

Windows 10

Right-click the Start Menu button and choose Settings:
Start typing “choose a” in the search box and click “Choose a default web browser” from the list:
Click the name of the current default browser and select another browser from the list:
Windows 7

From the Start Menu, choose Default Programs:

Click on “Set your default programs”: 
Select the browser you want to set as the default and click “Set this program as default”
